

Ava Table Lamp

Our AVA table lamp is a genuine showstopper which incorporates a slice of ingenious visual trickery. The metal base comes together as two tetrahedrons balanced one on top of the other, their centre of gravity precisely positioned to create a strong and stable platform. It appears, however, as one cohesive entity, twisted around a central axis. This simple but intriguing geometric form catches the eye and introduces a dash of drama, without overpowering the rest of the room. The AVA table lamp is available in a selection of our standard and specialist finishes. Please note that the listed height does not include a lamp shade.
