

### *Balzac Plinth*

The Balzac plinth echoes the sculptural quality of modern art objects, providing the perfect platform to display them in all their glory. Its solid, geometric form is eye-catching and contemporary. Choose from one of our many finishes to complement your favourite art pieces or simply to suit your interior. You can also opt for a bronze top plate, which radiates a warm glow, illuminating objects from below and bringing them to life. The Balzac plinth is available in a variety of sizes, which work wonderfully when combined as a group. They also look great alongside other pieces from the collection, like the Balzac coffee and side tables. For advice on selecting the right plinth for your project, we invite you to have a look at our journal post.
